

## **ADRF Joins Anixter's Technology Alliance Partner™ Program**

Burbank, CA – March 31, 2016 – Advanced RF Technologies, Inc. (“ADRF”), a leading provider of in-building wireless equipment, announced today that Anixter has formally recognized ADRF as an official Technology Alliance Partner™ (TAP). ADRF and Anixter have already partnered together for several years to provide ADRF's Public Safety in-building solutions and passive components to Anixter's Enterprise customers. Now, as a Technology Alliance Partner™, ADRF has granted Anixter access to its comprehensive line of products, including DAS and in-building repeaters, to specifically focus on Enterprise-funded opportunities.

“The wireless market is changing where the carriers are increasingly investing their funds to provide wireless coverage solutions for large venues, thereby leaving small to medium sized Enterprises to fund their own systems,” said Seri Yoon, Director of Marketing at ADRF. “We are investing our resources in our new strategic partnership with Anixter to bring our robust carrier-grade equipment to the Enterprise market with greater ease, speed and cost-effectiveness.”

The TAP program delivers best-in-class solutions with industry-leading companies who, by partnering with Anixter:

- Offer customers a comprehensive, integrated and simplified solution
- Extend the sales and market reach of our collective organizations
- Create co-market solutions through branding and awareness
- Allow us to jointly sell solutions through strategic sales efforts
- Provide unparalleled support through the Solution Support team
- Deliver complimentary solutions validated with testing in our Solutions Lab.

These selected suppliers are True Partners who are committed to developing joint programs to promote our collective value to the market.

The TAP program enables Anixter to provide its customers best-in-class solutions that now feature ADRF's industry-leading products as well as the following benefits:

- Priority access to Anixter's technical resources including the Infrastructure Solutions Lab<sup>SM</sup> where Anixter and Technology Alliance Partners work to develop the right solutions for the most challenging technical requirements
- Comprehensive, integrated and high-quality products
- End-to-end solutions validated through interoperability testing
